GREAT GUNS

Stern Electronics, Inc. introduces, GREAT GUNS, a twin woodstock gun video game with all the player appeal of gun games of years past — plus many, many new features made possible by Stern's engineering expertise and technology.

Great Guns is a one or two player game presenting an attractive scenic and sharply defined series of target racks which generates competitive challenge for the players — thus insuring steady income and earnings throughout the continuous long life and popularity of the game.

FEATURES

- A variety of target scenes are progressively offered to the player. A total of nine (9) tantalizing scenes are possible depending on the players skill in shooting.
- A fixed number of bullets are made available at the start of each game (number of bullets are adjustable)

FEATURES continued

- When two (2) players play — a bonus of additional bullets is awarded each player
- Additional bullets are awarded to players through skillful shot scoring
- Target "Hit Zones" are adjustable from "easy" to "medium" to "difficult"
- Tantalizing and realistic audio sounds to match target scenes
- Game will automatically "time itself out" if no shots occur after each 5 second interval (i.e. 5 bullets subtracted if no shot occurs in 5 seconds).
- Special Option Accessory — Great Guns can be supplied with "Skill Return" feature which will return player's coin or token in obtaining a pre-set score (adjustable).
- Great Guns, a game for All Locations and All Seasons.
- Sized for the "STREET".
